

Solar to XT60i Cable 10AWG 50FT Extension Cable

Brand: StarlinkPanama

Product Code: SLP-12

Stock: In Stock

Weight: 4.15lb

Dimensions: 50.00in x 0.00in x 0.00in

Price: \$140.00

Short Description

Upgrade your solar setup with our 10AWG 50FT XT60i Extension Cable! Perfect for Ecoflow power stations.

Description

High Quality & Low Loss: Solar Connector to XT60i Cable made of larger diameter 10AWG tinned copper wire which is minimize power loss in solar panel systems. Tinned copper ensures faster transmission and better stability, low resistance and anti-oxidant. Voltage: 600V

Widely Application: Our Solar to XT60i cable compatible with most solar panels and solar generators, suitable for solar generator battery packs, the XT60i connector can be connected to equipment with XT60 port, compared to 12AWG, the higher the current that can be transmitted by 10AWG, more stable, the wider the range of applications.

XT60i Connectors: IP68 waterproof rating, moisture resistant, not susceptible to moisture and dust contamination, maintains a stable connection to the device and improves the

safety and reliability of the connector.

High-quality materials: The sheath of the solar panel cable is made of high-quality PVC, which is heat-resistant to 105°C, use it outdoors without worrying about damage to the cable.

Specifications:

Connector Type: Xt60i

Cable Type: XT60i

Compatible Devices: Solar Panels, Portable Power Stations, Solar Generators

Number of Pins: 2

Maximum Current: 10 A

Maximum Voltage: 600 volts

Gauge: 10AWG

Item Weight: 4.15 lbs (1.88 kg)

What's Included:

(1) Solar to XT60i Cable 10AWG 50FT Extension Cable

Product Gallery

Anti-reverse XT60i connector

The XT60i connector has an anti-reverse connection function that prevents accidental reversal of positive and negative polarity when connecting device, and will automatically cut off the power supply to protect the device and improve the stability and safety of the circuit.

The image shows a close-up of the XT60i connector, which is orange and black. It has two pins and a locking mechanism. The text describes its anti-reverse function. There are three circular inset images: one showing the connector from the side, one showing the internal contacts, and one showing the connector from the front.

WEATHERPROOF CONNECTOR

Dust-proof and IP68 waterproof
Being flexible even in cold weather

The image shows a weatherproof connector in a blue water background. The text describes its weatherproof features. There are three circular inset images: one showing rain, one showing dust, and one showing moisture.

Rainproof Dust-proof Moisture-proof

10 AWG Cable

Insulator Material:
High quality PVC

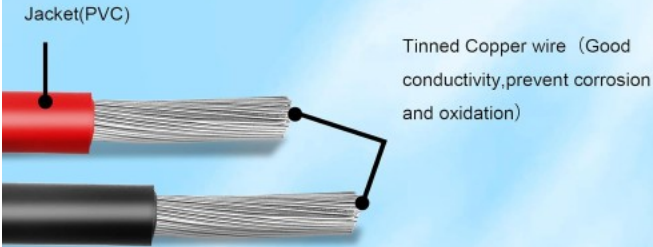

Rated voltage: 600V

Maximum 105°C

Rated Current: 35A
